Our foster program applies to a wide range of animals and needs. Many factors are considered when the shelter determines when an animal needs foster care. These include but are not limited to age, failure to thrive, depression, anxiety, high arousal, fear, under socialization, undergoing treatment for an illness or medical condition, physical disability/impairment, and behavior modification support.

Are you *not* comfortable helping with any of the examples above? Please list.

Frequently asked questions (and answers):

Q What kind of foster homes are you looking for?

A Our biggest needs are environments *without* small children, other animals and individuals that have the time to bottle feed kittens.

Q How often do you need me to foster?

A Our foster program applies to a wide range of animals and needs. Fosters are needed when we have an animal that the shelter feels would do better in a home environment.

Q How long will I need to foster this animal?

A The time an animal spends in foster care can range from 2 weeks to 6 months. It all depends on the individual animal's needs and progress.

Q How much will it cost me to foster an animal?

A The shelter will provide all supplies and medical care. Fostering a pet is of no expense to you unless you want to provide supplies at your own cost.

Q Will you contact me when there is an animal for me to foster?

A Yes, the shelter will contact you when we have an animal in need that matches with your specific environment and wants for fostering.

Do you have questions for us? Please list.
